

THE OUTCROP.

Devoted to the Mining and Development of the Windermere and Golden Divisions of the District of North East Kootenay.

Year VII, No. 8.

Wilmer, B. C., Thursday, July 28, 1906.

\$2.00 Per Year.

Subsidy is Not Extend

Dr. Watt Quotes From the K. C. R. Subsidy Act to Prove This

Fort Steele, B.C., July 20th, 1906

Editor The Outcrop:

Dear Sir,—To set at rest incorrect reports as to the route of the Kootenay Central Railway and an alleged extension of time, would you kindly publish the following extracts from the Subsidy Act just passed at Ottawa:

"31. To the Kootenay Central Railway Company, for a line of railway from Golden 'towards' the International Boundary line, via Windermere and Fort Steele, and crossing the Crows' Nest Railway at or near Elko, in lieu of the subsidy granted by Chapter 57 of 1903, Section 2, item 66, not exceeding 186 miles."

The use of the word "towards" instead of "to" is quite unobjectionable.

As to the time limit I need quote only a portion of Section 4:

"All the lines for the construction of which subsidies are granted, unless they are already commenced, shall be commenced within two years," etc.

There is thus no extension of time granted to the Kootenay Central Railway.

HUGH WATT, M.D.

EXPERTS ON FRUIT TREES

Where Red Clover Grows Fruit Will Grow Plentiful

Meers, Brydon and Metcalf, president and member respectively of the B. C. Fruit Growers Association, accompanied by Maxwell Smith, Dominion fruit inspector, recently visited Cranbrook and the following is culled from the Herald's report of their visit:

Mr. Brydon, after some general conversation with these present, proceeded to practically demonstrate the different and most approved methods of pruning fruit trees, selecting for the purpose certain of the smaller trees. His operations were carefully studied and were of a most instructive and informing character. He explained that the better opinion now prevailing was that in all cases apple trees not exceeding a year old should be planted. When planting the tree out it should be cut off about three feet from the ground. During the first year after planting they should not be interfered with, but allowed to grow as much as they pleased till the early fall, when the tips of the lower twigs and branches should be pinched, not cut off, and the top leader, which will have sprouted from a little below the point where the top was cut off before setting out, should be allowed to grow.

In the second year from setting out the yearling, the tree will be well started, and in June it will be advisable to cut off all the limbs except four, still retaining the top leader. These four limbs should be selected well down the stem at, say two feet from the ground and should be well distributed round the trunk so that the weight will be well and evenly balanced on all four sides. This course will lead to the tree assuming the pyramidal form, and will also be the most convenient for easy spraying and net picking. The object sought to be arrived at is to have the tree as low

headed as possible.

No doubt, as pointed out by these gentlemen, the proper pruning and treatment of the trees is a point of much importance, but the matter on which access really depends is the proper selection of the trees best adapted to the locality and the climatic conditions. The cause of persistent failures is alleged to be some softness or tenderness of either bark or wood or both, which permits the freezing of the succeeding sap in the spring in the presence of a cold snap such as occurred last March, when the leaves were well out and the blossom set. As is well known, all liquids expand on freezing, and when the sap of the apple tree expands, it apparently bursts the walls of the tiny vessels which carry it, pretty much as a severe wrench will burst the sheath of a muscle. Just as the fluid in which a muscle moves will extravasate and choke the tissue around the place where a sprain occurs, so too will the sap extravasate and choke the wood of the trunk and limbs of an apple tree which has got frost bitten. The human body will absorb this extravasated fluid, but it is death to the limb of a tree and very frequently to the entire plant. It is very necessary, therefore, to plant hardy trees, known to be able to resist the frosts of the winter and spring. It is only experience, extending over many years, that will inform one of the varieties best adapted to any particular locality.

As to the suitability of the Cranbrook neighborhood for successful and extensive fruit culture the experts had no doubt whatever. The question arose in a general way, and to settle the matter once and for all, Mr. Brydon asked: "Can you grow red clover here?" He was, of course, assured that we could, land, plenty of it. "Well, if you can," he answered, "you can grow fruit—lots and plenty of it."

The Outcrop is on sale at A. R. Yates Drug Store, Wilmer.

To drive flies out of a room burn a small piece of gum camphor, or mix a pint of lavender with an equal part of water, and put it in a shallow pan, or spray about the room, especially over the table linen. This delicate odor is very offensive to flies, who flee from it.

Wilmer Rifle Association

The Wilmer Rifle Association members made the following scores during the past week:

W. Morphet	200	200	600
A. R. Yates	18	24	10-52
J. Hurst	31	32	28-91
J. McLeod	20	33	30-89
J. McLeod	25	33	25-81
Capt. R. Elliott	31	30	25-80
T. Martin	19		

In the Canadian League matches A. R. Yates secured a 1st Class Marksmanship Certificate and Capt. R. Elliott a 2nd, with the following scores:

A. R. Yates	82	93	55	90-320
R. Elliott	74	101	85	80-340
F. L. Snook	82	81	92	75-250

F. L. Snook came within 7 1/2 points of securing a second.

DISTRICT CROPPINGS

And Other Items of Interest in a General Way

A week ago The Outcrop representative, with his wife and boy, spent part of two days at Walker Tegart's ranch, east of Windermere, and it is a long time since we had so pleasant a time. Mr. and Mrs. Tegart and their children have a very pleasant home and they all have a happy way of making one feel quite at home among them. Their residence is a tastefully situated close to a creek, down which a cool brook flows even on the hottest days, making the pretty lawn a most desirable place to rest. The creek also serves to irrigate thoroughly Mr. Tegart's 400-acre ranch, which is admittedly one of the very best in the valley. Further, the creek turns a waterwheel that produces 20 horse power, which is now used to pump feed for the stock, and will furnish power to run the threshing machine and elevator this fall. Mr. Tegart now contemplates the installation of an electric light plant to be run by this wheel, for lighting his residence and stables, and the people of Windermere are requesting him to furnish light for the town with it. A walk over the ranch proved that he would reap a bountiful harvest this year of grain, hay, vegetables, etc. His plant trees are not so heavily laden this year as last, but his apple trees are bearing very well, and the gooseberries, currants and other berries are loaded with fruit. It takes a number of years, with plenty of hard work, to get this ranch into its present good shape and the owner deserves all the property that is now just beginning to come his way.

Joe Tall has been given the contract of hauling the Black Diamond ore to the river. He will pack the ore from the mine to the end of the Toly road at the North Fork, from where Arthur Tegart will haul it with six horses in a "trail wagon", that is, two wagons fastened together tandem. This is said to be the best way to haul heavy loads, but it is feared that there are too many sharp turns on the road to work advantageously. However, Mr. Tegart has worked this plan successfully in the Cariboo and the experiment here will be watched with interest by all timbermen.

Mining, lumbering and agriculture comprise a great industrial trio, and are now just beginning to stir a healthy excitement in this valley. Just back to it.

Two teams are now steadily engaged hauling ore from the Flanagan mine to the river.

Try The Outcrop for Job Printing

Miss Snook returned to Wilmer last week, having spent several weeks visiting friends at the Coast, Nelson and Calgary.

Work on the Horse Thief bridge is nearing completion, and the repairs will make it a more substantial structure than ever.

J. D. McBride, the Cranbrook merchant, has been expected to arrive in Windermere for several days with his new automobile.

The W. M. Co. are selling some (made in Britain) currants and gooseberries for preserving. Now is the time to prepare for next winter.

Sam, A. Jackson, the popular tourist tailor, is due on Saturday's steamer and will be prepared to clothe the trail-blazer as well as the capitalist.

Miss Woods and Miss Remond arrived from Banff on the steamer Ptarmigan Saturday, and are the guest of Mrs. R. A. Kingston at Windermere.

Joe Williamson and Geo. Scott returned Tuesday from No. 3 creek, where they have been developing the Steel group with good results.

If every business man could do business on a strictly cash system it would be a blessing to us all. If we all had to pay cash we would learn to live within our means. It would save business men the expense of loss keepers and the loss of bad debts, all of which some one has to pay for. If our employers gradually work into a strictly cash system it would be better for us all.

Frank Papp: A case of more than peculiar interest, which has been engaging the attention of the court here for some time, was decided this week. Mrs. Harry Howard, of the Comstock station, Blainmore, was fined \$20 and costs for allowing dirt throwing on the premises. Frank Carrier, the bartender, and Harry Thielstone, a participant in the party, were each fined \$20 and costs.

T. C. Connors and Alex. Ritchie have returned from their trip to the Rockies and state they disposed of all of their horses on the prairie at good prices. They had a good trip over the mountains although the Kootenay river was high and they experienced some trouble in finding it. They went north as far as Tied Deer and report all the farms they passed through to be in a flourishing condition.

One of our citizens who occasionally slips down for his wife, because tired of the life saying that "it is not a man's work." Not feeling disposed to lose his help she brought the Bible out to convince him of his error and read as follows from 11 Kings 21:13: "And will ye Jerusalem as a man with a dish, saying it and turning it upside down." It is needless to say that he is still doing his occasional stint.

Camping parties should now be very careful to see that they extinguish their camp fires before leaving them, as the continued dry weather has made the smallest fire very dangerous. Last week a fire, supposed to have been started from a camp fire, burned along Toly road, near the 15th mile post, for several days before it was put out. It is due only to the most favorable winds and the work of a few men that timber worth thousands of dollars was not consumed and the road badly blocked. As it was many acres were burned over and the road blocked with trees in place. Mr. Lake and The Outcrop reporter had to run their horses a lively pace for 30 yards to get by the fire and have no doubt regret to not make a place again.

It. F. Papp was last days in getting in his hay and several acres were delayed by the fire.

Join Our Booster Club

Here is a Big Chance to Boost for This Wealthy Valley

The Outcrop has completed arrangements with 125 local newspapers scattered throughout Manitoba and the Northwest to publish a series of articles on the resources of this valley to be supplied by us, which will give the valley one of the best advertising mediums that can well be imagined. Each article will thus have a circulation of over 100,000 copies, and will be read by the prairie farmers, as well as by people in every country in the world.

It must be admitted that there is no medium that can give better results than a local paper to attract the attention of people to a new country, and for this reason it is not necessary in this announcement to dilate on the many advantages of our new scheme. All we ask for our readers to give this proposition a few minutes of serious consideration, and, we believe, all will admit it is the greatest boosting proposition yet submitted in this province.

At the same time The Outcrop has arranged to improve our own paper, and within a few weeks will be giving from eight to ten columns more of reading matter than we have in the past.

To accomplish all of this means more expense to The Outcrop, and, therefore, we have arranged that all who are anxious to boost this valley will have the opportunity:

1st. Each person is asked to subscribe for an extra copy of The Outcrop and to ask their friends to do likewise.

2nd. Every man who has any business may give us an advertisement, costing from \$2 per month upwards.

3rd. We want all who can supply us with a good readable article or the information for one to communicate with this office at once.

In these articles it is the intention to portray the mining, lumbering, agricultural and other industries between Golden and Cranbrook, as well as the scenery, climate, etc.

Isn't the scheme a good one? Will you not boost it along? We can't do it alone!

Black Diamond Mine

Last Thursday morning The Outcrop reporter accompanied Joe. Lake on a trip to the Black Diamond mine, situated on the north side of Toly creek and on the east side of Jumbo Fork, and about 25 miles up the creek. Since returning the reporter, who in turn comprises our entire staff, has been too busy to give the write up to this property it deserves and will give it in another issue. However, the Black Diamond is one of the most promising properties we have had the opportunity of seeing in this camp. Already it is a shipper and has a great deal of shipping ground blocked out six men are at work on the property and a new trail with a good grade was almost completed to the highest workings. There are four tunnels on the property and one has been struck in at No. 1, where they have about 50 feet to go to get under the one showing on the surface. No. 1 tunnel is now 1073 feet, No. 2 148, No. 3 120 and No. 4 30 feet. There is a 12 foot crescent tunnel in No. 2, making a total of 100 feet of tunnel on the property. There are also a 27 foot crescent below No. 4 and a shaft down 25. There are numerous open cuts and the ledge has been stripped on the surface in places to several hundred feet. At one open cut we estimated there was over five tons of ore ready for shipping. There was about 30 tons ready to ship and probably 25 tons more in the dump at No. 3 tunnel. There is plenty of ore blocked out that can be mined and sacked much faster

than the pack train can carry it away. The work throughout has been done most systematically and proves what careful and thorough prospecting on the surface will accomplish, for in every place where underground work has been done the ore showing on the surface has been encountered, which also goes to prove that the ore "goes down."

Any person who has any doubts about The Outcrop having good reasons for boosting the agricultural possibilities of this valley is invited to take a peep at the garden in front of this Palace.

"Old Man" Simpson will have to take a back seat in boosting Cranbrook as a Banana belt. Capt. Cameron has banana, orange and lemon trees growing at his home in Windermere and growing well. Now, what will the Herald think of its banana belt. The Herald is a great lover of botany as his botanical book, quoted testily elsewhere goes, and the "Old Man" will have to find it he would keep up with our Chief.

We are pleased to see so many of our citizens taking pride in their homes in this valley. The word "home", next to that of "mother", is the greatest ever uttered by human tongue. What a refuge the home is when darkness goes there! How glad one is to get a glimpse of home when time and space have separated him from it! How for a bit I ponder. There is a great deal to be said for the home. It is a little world in itself, a little world that is more inviting to the occupants than all others. Such rivalry is certainly laudable.

W. F. EVANS,

Publisher and Proprietor.

WILMER, B.C., THURSDAY, JULY 26, 1906.

Twenty-four hours after the fire along Toby road was first known two men might have stopped it by a couple of hours work. This proves once more the great need of the government appointing fire wardens.

There are hundreds of wealthy ranchers on the Prairie—just over the Rockies—who would be glad to leave the plains for a few weeks every year and climb our mountains and camp in our valleys, if they knew anything about them or how near they were to them. This information The Outcrop intends to supply them with. Will you help us to do it? Some of them are sure to locate here and all who come are certain to leave some money here and send others to gaze upon our magnificent scenery.

A factory is soon to be established in British Columbia—at what point has not yet been determined—for the manufacture of the new British high power explosive, ammonal. Ammonal is the newest invention in the line of explosives, and is used for mining, quarrying, and similar operations. In strength it represents from two and a half to three times its weight in black powder. It is stronger by 50 per cent than dynamite, and is about on a par with gelignite. Its advantages are that being a dry powder it is not affected by heat or cold. It cannot be exploded by shock but needs a detonator or cap similar to those used for dynamite. When ignited by flame it burns slowly, and in fact it is only ignited in this way under the most advantageous conditions, and a pile of it will usually scoulder and go out of itself. Finally there are no objectionable fumes left after the explosion, says an exchange.

The Outcrop's scheme for making known the resources of this valley will, we believe, result in more real good than all the pamphlets and magazine articles that can be produced, yet if any person can tell us of anything better we are willing to drop it and co-operate with them. Our plan will, however, be hard to beat, and besides it will give every individual a good opportunity to boost, where good results are sure. Already we have secured the services of several of the most capable writers that can be obtained; by this we mean men who know the country and subjects upon which they will write, and who also have the ability to write intelligent and readable articles. The main feature in any enterprise is persistence and The Outcrop is prepared to carry this on indefinitely if we can keep up the extra expense that it necessitates, which is really a trifle when distributed in the manner set forth elsewhere in this issue. We shall be very much pleased to have our subscribers give us any suggestions in the matter and hope one and all will help us in making this country known to the thousands of people on the prairie.

The sapphire workings of Yogo Gulch, Montana, are being gradually developed into a great and permanent mining industry, says G. F. Kunz in a report on precious stones, published by the United States geological survey. Taken as a whole the Yogo dyke is perhaps the greatest gem mine in the world. It is four miles long on the surface and being a true igneous dyke, descends to an indefinite depth. It is estimated that the entire content of workable bearing rock would approximate 10,000,000 cubic yards. A mining plant is now being erected here which will quadruple the previous output and make Montana sapphire mining a very important factor in American gem production. The stones obtained are not of large size. They range from "culls" used for watch jewels and other mechanical purposes, to gems averaging, when cut, from half a carat to two or three carats, and rarely up to five or six. As gems they are brilliant, free from flaws and of good color, ranging from light shades to the rich, deep blue of oriental sapphires. The Yogo crystals have an advantage for mechanical uses over East Indian stones in their form, which is largely short prismatic or rhombohedral with flat basal terminations, and hence require much less cutting for such purposes as watch jewels. The gems are sent to Amsterdam for cutting and yield from two-fifths to one-half their weight of finished stones.

A Madman's Delusion.
 Dean Pigeon tells the following story of a brilliant man who lost his mind temporarily through overwork and was confined in an English asylum: "His delusion was that his stomach was full to repletion of rats. There was no room for anything else. Hood said to me, 'Go and talk with him and lead up to the subject of rats.' I found him, as is very common, perfectly sane on every subject but this. After some conversation I said to him, feigning not to know who he was: 'You seem to be a very well informed man. Have you given your attention to natural history, because I notice that the question is being discussed as to whether the species of the genus rat called the Norwegian still exists?' Instantly he replied, 'Oh, certainly,' and unbending his dress, said, 'Every known species of rat, sir, is here in my stomach,' and, localizing the rat with his finger, said: 'Here in this part of my stomach is a Norwegian rat. You can assure your friends that as long as I am alive no species can die.' Under the kind and humane treatment of Bethlehem he was soon at work again and had, of course, no recollection of his delusion."

Reading in Bed.
 Commenting upon the recent discussion of the habit of reading in bed, American Medicine concludes that if the position is literally prone the habit is bad, because in such a position the eyes are fixed upon the book in a straining and harmful way and the head and trunk as when in a chair, there can be no evil consequences, provided a good rich light is rightly placed behind and at one side of the head.

The greatest argument for reading in bed is that the attention is not distracted by the discomfort of the body, the noises and interruptions usual at other times. Let one take an erect position of the body and head, be assured he has a good outlook and that his light is strong, white, steady and properly placed. He may then read with impunity until drowsiness cautions him to stop.

Long Range Prayer.
 The Swiss mountaineers have a custom of calling through speaking trumpets at dusk each evening, "Praise the Lord God!" This call may be started by one herdsman and is answered by others from neighboring peaks, the sound being much prolonged as reverberates from one mountain to another. After a short interval, supposedly devoted to prayer, a herdsman calls in the same manner, "Good night!" This, too, being repeated by his fellows. Then all retire to their beds. The impressiveness of these calls, echoing and re-echoing from rock and mountain to mountain, can easily be imagined.

Asking a Great Deal.
 "Yes, sir," said the lady principal of the college for girls, "we are proud of the thorough athletic training we give our students. We see that they have every attention from competent instructors and develop their physique along with their intellect."
 "Um—yes," observed the father. "You make them strong and lively, do you?"

"That is one of our chief aims."
 "Well, do you think you could educate Lizzy here so that in time she will be strong enough to help her mother over the discharging when the cook is on strike?"

Spurred the Historian.
 On one occasion during Mommensen's residence in Italy, when making an excursion in the neighborhood of Rome with some tourists, the party was stopped by brigands. The latter, while busy rifling the company's pockets, inquired their names. "Sono Tavoro Mommensen," was the choleric professor's indignant reply, whereupon the chief of the band seized his hand. He said he would scorn to rob one who had done so much for Italy's renown.

A Kicking Deferred.
 Aunt Clara (to her young nephew, who has just brought a bucket into the parlor where she is sitting—Good gracious, Tommy, what are you doing with that bucket? Take it down to the kitchen at once. Tommy—I want you to kick it. Aunt Clara, 'cause I heard papa saying when you kick the bucket we'd get at the very least \$25.000.

Panama.
 It is supposed by some that Panama derived its name from the native word for "intensity." Explorers of the interior tell of swarms of butterflies which at times rise on the slopes of the mountains in dense clouds, darkening the sunshine. Others maintain that the name is from an Indian word meaning "abounding in fish."

A Reminder.
 "There," said the tailor, "that suit certainly fits you perfectly."
 "Yes, indeed. You may justly feel proud of that," replied the customer. "It's a credit to you."
 "Well—er—I hope you won't forget it's a debt to you."—Exchange.

Reaper.
 "Children don't seem to have as much respect for their parents as formerly."
 "No," answered the cynic, "and I have never quite been able to make up my mind whether this is because modern children are less dutiful or more discerning."

Boasting Wife.
 "Voiced Wife—There is no calamity that can befall a woman that I have not suffered! Amiable Husband—Wrong my dear. Now you have never been a widow. Voiced Wife—I said I was a widow!"

Croppings

Capt. Canby has chartered the steamer Ptarmigan to make an extra trip up the river with a party of his Golden friends, and at the hour of going to press the steamer is expected to arrive within a few hours.

Monday Harry Munson called at The Outcrop office and stated that he did not write or have anything to do with the letter appearing in the Golden Star signed "H.", but he admitted he wrote a letter to the Star signed "One of the Boys," which was refused publication. He also states he never refused to give any person food at \$2.00 a week, but that when he offered to get food for two men Foreman Ogleson told him he was not to do so, and as he was cook he had to obey orders. Harry wanted to know what reason The Outcrop had for thinking he had any dislike for the reporter and said that the reports to that effect were untrue. He was referred to the Star and the fact that it had been stated two weeks before it appeared that he had not even a hand letter to that paper, but further than that there was no reason known for ill feeling. Harry said he had been made a "cat's paw" for the meanness of others and would not rest until he got even with them, whoever they may be. He said he would find out the name of writer of the letter if there is any manhood left in the man who wrote it he should now make himself known before the law takes its course.

LAND NOTICE.

Notice is hereby given that I intend 60 days after date to apply to the United States Land Office at Wilmer, B. C., for a patent to the following described lands in the North East Kentucky District: Section 36, Township 36 N., Range 10 E., 1st Meridian, 1st 1/2 Sec. 36, 1st 1/2 Sec. 37, 1st 1/2 Sec. 38, 1st 1/2 Sec. 39, 1st 1/2 Sec. 40, 1st 1/2 Sec. 41, 1st 1/2 Sec. 42, 1st 1/2 Sec. 43, 1st 1/2 Sec. 44, 1st 1/2 Sec. 45, 1st 1/2 Sec. 46, 1st 1/2 Sec. 47, 1st 1/2 Sec. 48, 1st 1/2 Sec. 49, 1st 1/2 Sec. 50, 1st 1/2 Sec. 51, 1st 1/2 Sec. 52, 1st 1/2 Sec. 53, 1st 1/2 Sec. 54, 1st 1/2 Sec. 55, 1st 1/2 Sec. 56, 1st 1/2 Sec. 57, 1st 1/2 Sec. 58, 1st 1/2 Sec. 59, 1st 1/2 Sec. 60, 1st 1/2 Sec. 61, 1st 1/2 Sec. 62, 1st 1/2 Sec. 63, 1st 1/2 Sec. 64, 1st 1/2 Sec. 65, 1st 1/2 Sec. 66, 1st 1/2 Sec. 67, 1st 1/2 Sec. 68, 1st 1/2 Sec. 69, 1st 1/2 Sec. 70, 1st 1/2 Sec. 71, 1st 1/2 Sec. 72, 1st 1/2 Sec. 73, 1st 1/2 Sec. 74, 1st 1/2 Sec. 75, 1st 1/2 Sec. 76, 1st 1/2 Sec. 77, 1st 1/2 Sec. 78, 1st 1/2 Sec. 79, 1st 1/2 Sec. 80, 1st 1/2 Sec. 81, 1st 1/2 Sec. 82, 1st 1/2 Sec. 83, 1st 1/2 Sec. 84, 1st 1/2 Sec. 85, 1st 1/2
